NO SHORTCUTS

NO SHORTCUTS

NO SHORTCUTS

Like the modest champion sitting in the corner listening as others spit their egos all over each other, SCOTT quietly lets its achievements, its victories, its skills speak for themselves. We don't make products for those who yearn to be noticed. We make them for those who are going to do what they do whether there's anyone watching or not. If you're like us, you say what you say, do what you do, ski where you ski because you love it. You do it the right way. You do it for the right reasons.

SCOTT RUNNING

Why do you run? Is it to find out what your body is capable of? To connect with the outdoors? To escape? To seek? To feel like the best version of yourself? The truth is, it doesn't matter. Running is in you, and when the trail is calling, you answer without a second thought. It's not so different from designing and building the perfect running shoe. In order to make great products, we have to be as curiously passionate about the trail and road, as patient about the training and as filled with dedication as the runners we make shoes for. When we obsess about how to make a shoe lighter, more breathable or more comfortable, we aren't doing it so we can announce it in a catalog. We're doing it because we love running in great shoes just as much as you do. Call it selfish. But we figure if we fall in love with a running shoe ... you will too.

A full-page photograph of a runner on a dirt trail. The runner is on the right side, wearing a black and neon green running shoe. The background shows rolling hills and mountains under a cloudy sky. The word 'TRACTION' is overlaid in large white letters, with a stylized 'S' logo to the left.

TRACTION

MATTERS

**WHAT DOES IT TAKE TO CONTROL MOTION.
YOU WANT TO CHOOSE YOUR OWN PATH.
CHANGE DIRECTION AT WILL.
ACCELERATE INTO A CLIMB.
FEEL CONFIDENT ON THE DESCENT.
FIND THE LIMITS.**

**CONTROL MATTERS.
PERFORMANCE MATTERS.
TRACTION MATTERS.**

Re-Source by SCOTT is an important step for us in becoming a responsible steward of our planet and society. We look forward to improving our practices in each of these fields.

PEOPLE

We consider that all people involved in our supply chain should be treated fairly with dignity and respect.

PLANET

We take into consideration that the earth's resources must be used in such a way that ecosystems and future generations shouldn't be adversely affected.

PRODUCTS

We aim to maximize the sustainable nature of our products while still maintaining their high level of performance through innovation, technology and design.

SUSTAINABLE DEVELOPMENT GOALS

Our goal is to have a sustainable attitude in everything we do, and we want to take responsibility for our impacts on people and our planet. Our customers must feel reassured that our goods and services meet our high requirements for quality and safety and that they are made under proper working conditions. Our sustainability work is ongoing and reflects the changes in issues as our program evolves and matures. A most important part of our work is to integrate sustainability thinking in all parts of our business and for it to become part of our brand DNA. This year, we have focused on aligning our practices with the United Nations Sustainable Development Goals (SDGs). The SDGs are 17 interlinked goals that represent a blue print to achieve a better and more sustainable future for all. We have focused on the following seven.

Reduced Inequalities

Clean water & sanitation

Sustainable cities & communities

Climate action

Responsible consumption & production

Decent work & economic growth

Partnership for the goals

WHAT IS RE-SOURCE BY SCOTT FOR APPAREL

RE-SOURCE PRODUCTS

Either use a minimum of 50% recycled materials or are made with 100% certified renewable.

ECO MATERIALS

MERINO

All merino wool products are certified by MAPP (Merino Advanced Performance Promise). All of our merino wool is certified mulesing free.

RPET

All of our recycled polyester comes from post-consumer recycled PET bottles and diverts waste from ending up in landfills or the environment.

RILSAN® CLEAR

All of our sunglasses' frames are made from 45% bio-based polymers sourced from castor beans, contributing to the reduction of our carbon footprint and dependency on fossil fuels, while maintaining a high level of performance.

27 TONS OF CO²
compensated for our
Athlete's travel with
Almighty Tree.

SCOTT RUNNING SEGMENTATION

MOUNTAIN

High up on technical and rocky terrain, this is about running in the most exposed mountain environments.

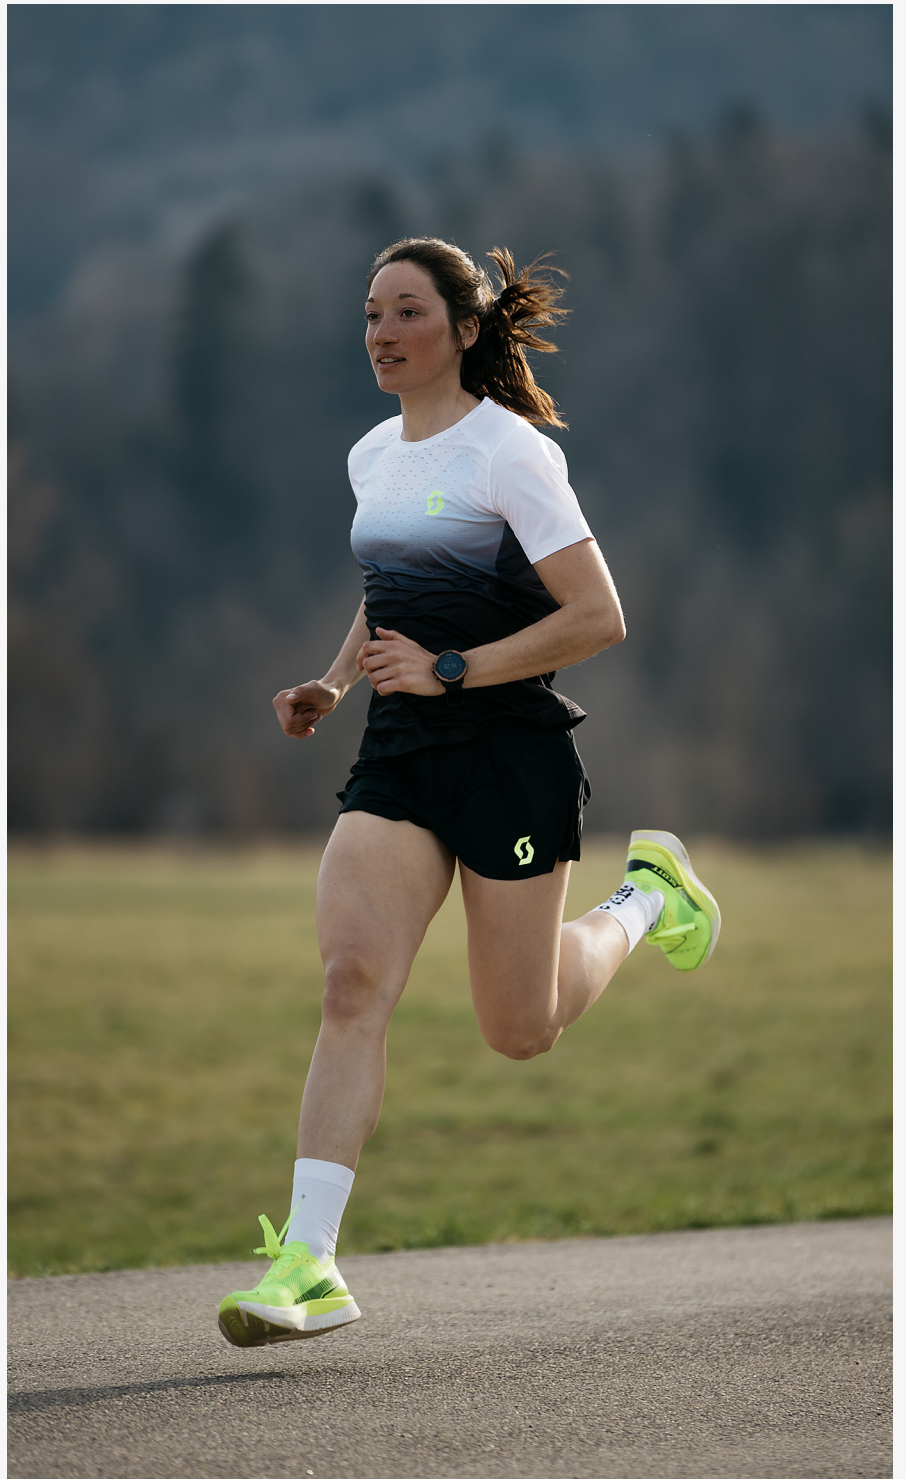

TRAIL

Running on man made trails that are rolling. Exploring through forests, mud, meadows or anywhere away from asphalt streets.

ROAD

Running short or long distances at fast or slower paces, exploring the roads of known and new urban areas.

SUPERTRAC AMPHIB

NEW SUPERTRAC AMPHIB
YOUR BEST MULTI-SPORT ALLY, WHATEVER THE CONDITIONS.

BEST TRACTION ON MUDDY TERRAINS

The radial traction outsole will give you confidence. With a bite face for traction and an outer face that escapes mud, the lugs are able to rotate through the surface while offering ultimate traction in a 360 degrees sphere.

MADE FOR RUGGED & WET SURFACES

This shoe is ready for any challenge. The KPU upper provides a rugged and highly durable protection for your activities.

EXCELLENT LEVELS OF DRAINAGE

This is our first shoe specifically designed for multi-sport use whenever you come in contact with water. Be it obstacle course races, fell running, orienteering or exploring coastlines and rivers the KPU upper provides excellent levels of drainage.

ULTRA CARBON RC

NEW ULTRA CARBON RC
OUR MOST TECHNOLOGICAL CARBON TRAIL SHOE TO DATE.

RACING FOOTBED

KINETIC LIGHT FOAM

CARBITEX DFX CARBON PLATE

KINETIC FOAM

ULTRA TRACTION OUTSOLE

CARBON PLATE FOR ENERGY RETURN

The shoe features a CARBITEX DFX plate that keeps you moving efficiently for long hours combined with our evolved rocker technology. The unique benefits of this carbon fiber plate is its dynamic flexible property; the plate responds to you by increasing stiffness as you increase speed, and retains flexibility at a lower pace.

NEW ULTRA TRACTION OUTSOLE

This outsole is designed specifically for ultra races on fast rolling trails. Utilizing a semi radial design to give maximum efficiency in forward motion while maintaining multi direction traction elements to keep you feeling confident when the trail starts to twist and turn. Our newest traction solution is best suited to fast, smooth summer trails of any distance at any speed.

KINETIC LIGHT FOAM

The shoe feels light and cushioned thanks to our Kinetic Light Foam and high levels comfortable from a specifically designed engineer upper. This is your go to shoe for trail marathons to ultra race distances.

PURSUIT RIDE

THE PURSUIT RIDE IS OUR LATEST PERFORMANCE ROAD RUNNING SHOE.

ER2

Evolved Rocker2 builds on 10 years of continued R&D, creating our most efficient running platform yet. ER2 applies our advanced understanding of biomechanical principles to promote a more dynamic running position, reducing heel strike impacts and increasing running efficiency. Simply put, you can run faster for longer, with less energy.

SCOTT KINETIC FOAM

The SCOTT Kinetic Foam is a lightweight and very responsive foam. It returns 14% more energy than standard EVA (Ethylene-vinyl acetate) resulting in a plush but stable and more dynamic run. You get more energy back so you can run faster for longer.

ENGINEERED AIR MESH

Using state-of-the-art weaving technology the Engineered Air Mesh was designed to offer lightweight support, flexibility and breathability where it's needed most for a dynamic road running shoe.

411075
411078

sole

profile

The Pursuit Ride is our latest performance road running shoe. Thanks to support elements in the upper and a stable yet responsive midsole foam, it is giving you just the right amount of stability where you need it most. The introduction of a TPE (highly cushioned) insole and additional padding adds high levels of comfort. Yet, our ER2 rocker geometry and the Kinetic Foam make it dynamic and fast so you can run faster for longer.

PURSUIT EXPLORE

FEATURING A 100% RECYCLED UPPER AND RECYCLED EVA, THE PURSUIT EXPLORE IS OUR FIRST PRODUCT THAT IS RE-SOURCE BY SCOTT RUNNING.

FASTER
FOR
LONGER

re  source
by  SCOTT

RE-SOURCE BY SCOTT RUNNING

Re-source by SCOTT running products are defined by the use of recycled, bio-based and/or renewable materials certified by third parties, representing a minimum of 40% more eco-responsible materials by weight. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations, and stimulating positive change in our communities.

ER2

Evolved Rocker2 builds on 10 years of continued R&D, creating our most efficient running platform yet. ER2 applies our advanced understanding of biomechanical principles to promote a more dynamic running position, reducing heel strike impacts and increasing running efficiency. Simply put, you can run faster for longer, with less energy.

ECO KINETIC LIGHT FOAM

The SCOTT Eco Kinetic Light Foam is our lightest and most responsive foam to date featuring recycled EVA (Ethylene-vinyl acetate). The high rebound midsole is soft, light and responsive but with high levels of durability. You get more energy back so you can run faster for longer and explore your world responsibly.

FLAT TRACTION

The outsole features a large stable surface area in contact with the ground for optimal traction even in wet conditions. Designed to enhance efficient running on road and hardpack surfaces, it has high levels of durability.

white

SCOTT PURSUIT EXPLORE SHOE
SCOTT PURSUIT EXPLORE WOMEN'S SHOE

411076
411079

Explore without boundaries. Based on the ER2 rocker platform for an efficient ride, a smooth heel to toe transition and the flat traction outsole, this performance running shoe allows you to explore your world responsibly. Featuring a 100% recycled upper and recycled EVA, the Pursuit Explore is our first product that is re-source by SCOTT Running. All aspects of the shoe are considered to create a product with the lightest footprint in both running and sustainability.

TRACTION MATTERS

TRACTION IN RUNNING IS THE FRICTION BETWEEN AN OUTSOLE AND THE SURFACE.

Whereas grip describes a static state, traction is characterized by the active balance of foothold in motion which is essential to run efficiently. Depending on the surface and type of runner an outsole must display different properties. By conducting scientific research projects with INDUSTRY-LEADING experts at the technical university of munich and our elite athlete team AS WELL AS DOING extensive field testing we are able to identify the requirements for an outsole to provide the best possible traction depending on its field of use.

THE SCIENCE OF TRACTION

Technical University of Munich is one of Europe's top universities, running 15 academic departments with over 41,000 students, and to date winning 15 Nobel prizes. To develop the best traction solutions for our running footwear we established a collaboration with Technical University of Munich in 2015. With their technical knowhow and scientific approach, we are able to explore and identify the mechanisms and crucial details of traction that result in our advanced outsole designs to enhance running performance.

Under the lead of Prof. Veit Senner, Head of the Department of Sports Equipment and Materials, a team of researchers has been designing, building and evolving a unique machine to test our running shoes and materials for their traction behavior and performance. Taking their results and recommendations into account. We are able to develop our elaborate outsole designs to result in the ideal SCOTT Traction Solutions.

SCOTT TRACTION SOLUTIONS

ULTRA TRACTION

Our Ultra Traction outsole is designed specifically ultra races on fast rolling trails. Utilizing a semi radial design to give maximum efficiency in forward motion while maintain multi direction traction elements to keep you feeling confident when the trail starts to twist and turn. Our newest traction solution is best suited to fast, smooth summer trails of any distance at any speed.

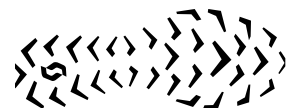

RADIAL TRACTION

With a bite face for traction and an outer face that escapes mud the lugs are able to rotate through the surface while offering unparalleled traction in a 360 degree sphere. This outsole is for running in the most technical exposed mountain environments.

ALL TERRAIN TRACTION

The strategic lug configuration creates superior forward and breaking traction on a variety of terrain and strategically orientated chevrons all around the forefoot provide extra stability when the runner needs it most. This is the solution for long training runs and ultra races on any mountainous terrain.

HYBRID TRACTION

Combining chevron cleats for straight-line power transfer with conical cleats that provide multi-directional traction to support high-speed cornering. This outsole is optimized for fast, efficient running on man-made trails.

VERSATILE TRACTION

With its multi-layered lug design the outsole bites into the different levels of rocks, roots and trail features to optimize the ground contact and enhance traction. This outsole is ideal for hardpack rolling trail.

FLAT TRACTION

The outsole features a large stable surface area in contact with the ground for optimal traction even in wet conditions. Designed to enhance efficient running on road and hardpack surfaces, it has high levels of durability.

SPEED TRACTION

This is our latest and most lightweight road traction for unique power transfer. Specifically designed to run fast and efficiently on road and hardpack surfaces.

CHEVRON-SHAPED LUGS

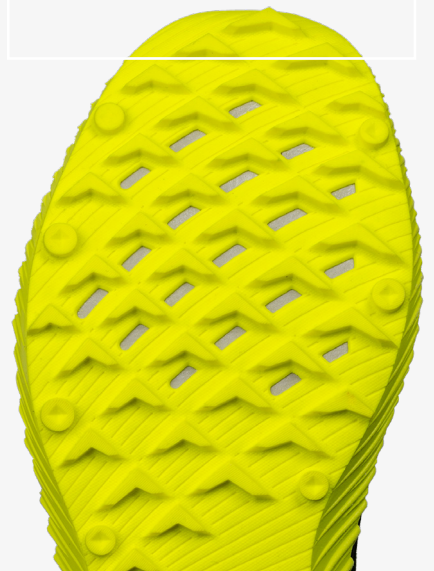

A chevron lug with a large bite surface provides maximum traction for straight-line power transfer. The outer face escapes the surface.

ROTATED CHEVRON-SHAPED LUGS

By rotating a chevron cleat by 90 degrees we can achieve exceptional lateral traction.

CONICAL CLEATS

A conical (round cleat) provides multi-directional traction to support high-speed cornering and traction on flat surfaces.

1. DEFINE THE TYPE OF RUNNING AND TERRAIN

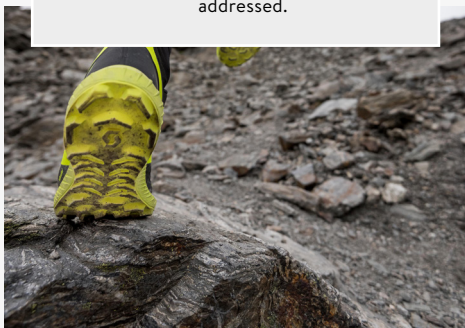

Here is where we need to be 100 % precise. The accurate definition of the terrain, the way of running in this terrain and the runner is essential from the very start of the development. It is how we make sure all requirements will be addressed.

2. DATA RESEARCH

To validate our concepts we first head to the laboratory. We back up all of our traction technologies with rigorous scientific research. Using data we can evolve and elevate the designs.

3. DESIGN PROCESS

At SCOTT every product is designed to be most functional and its functionality is determined by its design. Our designers create beautiful designs but are at the same time product specialists to innovate new traction technologies.

4. PROTOTYPES

The process from the first design on paper to the final product requires a series of prototypes. Each of them are run past laboratory tests, our athlete and quality analysis.

5. FIELD TESTING

This part of the process requires manpower. We ask a lot from our group of product testers which consists of elite athletes but also runners with all different characteristics to get a representative reflection of the diverse running community. Only by running lots of miles in our prototypes we can collect the data and feedback to refine and approve the full functionality of our new products.

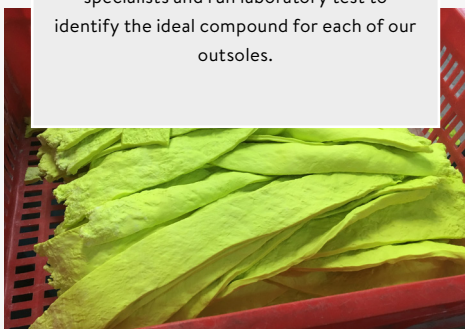

6. LABORATORY TESTING

Laboratory testing has become a big part in our development process. Only by constantly growing our database for material behaviour and outsole design performances we are able to develop our advanced traction solutions.

7. COMPOUND SOURCING

The best outsole design will not succeed if the compound is matching its requirements. This is why we work together with material specialists and run laboratory test to identify the ideal compound for each of our outsoles.

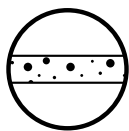

ERIDE MIDSOLE

The unique rocker shape of our eRIDE Midsole creates a very stable midstance, promoting the faster and more efficient running style that runners strive for. Regardless of running style eRIDE works with the body to promote a more dynamic running position, reducing heel strike impacts and increasing running efficiency.

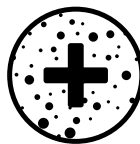

KINETIC FOAM

The SCOTT KINETIC FOAM is a lightweight and very responsive foam. It returns 14% more energy than standard EVA (Ethylene-vinyl acetate) resulting in a plush but stable and more dynamic run. You get more energy back so you can run faster for longer.

KINETIC LIGHT FOAM

The SCOTT KINETIC LIGHT FOAM is our lightest and most responsive foam to date. Enhancing the properties of our existing high-rebound midsoles, this new lightweight foam has even more rebound in an even lighter package. Soft, light and responsive but with high levels of durability. You get more energy back so you can run faster for longer.

AEROFOAM+

AEROFOAM+ focusses on a cushioned but stable ride which is key for performance on technical terrain in the mountains. This midsole foam is durable with dynamic rebound to offer protection while maintaining an efficient stride.

INTERNAL FIT SYSTEM

Focusing on foothold, comfort and dynamic stability the SCOTT INTERNAL FIT SYSTEM locks the foot in place to offer optimal power transfer from the foot to the ground and control when cornering.

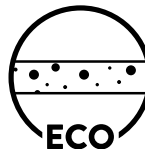

ENGINEERED AIR MESH

Using state-of-the-art weaving technology the ENGINEERED AIR MESH was designed to offer lightweight support, flexibility and breathability where it's needed most for a dynamic road running shoe.

EVOLVED ROCKER2

Evolved Rocker2 builds on 10 years of continued R&D, creating our most efficient running platform yet. ER2 applies our advanced understanding of biomechanical principles to promote a more dynamic running position, reducing heel strike impacts and increasing running efficiency. Simply put, you can run faster for longer, with less energy.

ECO KINETIC LIGHT FOAM

The SCOTT ECO KINETIC LIGHT FOAM is our lightest and most responsive foam to date featuring recycled EVA (Ethylene-vinyl acetate). The high rebound midsole is soft, light and responsive but with high levels of durability. You get more energy back so you can run faster for longer and explore your world responsibly.

WIND & WATER PROTECTION

GORE-TEX

For decades, GORE-TEX shoes have provided comfort and protection in all weather conditions. The microscopic pores of the GORE-TEX Membrane are impenetrable for rain and humidity but let sweat and heat escape, keeping your feet warm and dry. The result? Our GUARANTEE TO KEEP YOU DRY promise.

SCHOELLER® DYNAMIC

The schoeller® dynamic fabric is a comfortable all-round material with an extraordinary optic. Characterized by durability, freedom of movement and a high level of comfort, schoeller® dynamic becomes the preferred fabric for our running shoes when the trail turns to the extreme.

SCHOELLER® COLDBLACK

Schoeller coldblack® is a finishing technology designed for textiles that are exposed to sunlight over extended periods. In comparison to light colors, dark colors absorb more heat in direct sunlight. With coldblack® the heat absorption can be reduced to a minimum. The result is a noticeably better heat management.

SCOTT TRAIL STORM INSULOFT AL MEN'S JACKET

Cold and wind stand no chance on the trails when you're wearing the SCOTT Trail Storm Insuloft Alpha jacket. This jacket is made with an active Polartec® Alpha® Direct insulation that keeps you warm and protected from cold winds for better comfort. We introduced dual hand warmer pockets to make this jacket even more versatile. The jacket has an MTB rider-specific fit and additional waterproof back length for better coverage while riding.

FABRIC TECHNOLOGIES

OUR RESEARCH AND DEVELOPMENT TEAM WORKS WITH LEADING MANUFACTURERS AROUND THE WORLD TO DELIVER REVOLUTIONARY FABRIC TECHNOLOGIES THAT PROTECT YOU FROM THE ELEMENTS, GIVE MORE COMFORT TO YOUR BODY AND MAXIMIZE YOUR ENJOYMENT OF OUTDOOR ACTIVITIES, 365 DAYS A YEAR.

INSULATION

MERINO

Merino wool helps to keep cool in summer and warm in the winter. The structure of the fiber naturally traps air which promotes excellent insulation. Merino has a good moisture management and an excellent odor resistance which is really well received into the sports apparel. Merino garments are soft and comfortable against the skin.

MERINO ADVANCED PERFORMANCE PROMISE (MAPP®)

MAPP is absolute assurance that the Merino you have purchased has been tested for fibre strength and consistency, and passed. That means it will perform exactly as high quality Merino should with the highest environmental standards and which carry both ISO 9000:2015 and Blue Sign System Partner accreditation.

PRIMALOFT® GOLD INSULATION WITH CROSS CORE TECHNOLOGY

It is a revolutionary fusion of multiple Primaloft® technologies to create a product with warmth and comfort protection never achieved with a synthetic insulation. The insulation has a high warmth-to-weight ratio, is water resistant which make it lighter and more packable. It is also develop with 35% post consumer recycled content.

DUROLOFT INSULATIONS

DUROloft uses hydrophobic synthetic fibers arranged to mimic the structure of down. It traps warmth in air pockets, providing great thermal insulation / DUROloft Eco has the same properties than DUROloft but is made of recycled and recyclable fibers / DUROloft Bio is a mix of wool and Polylactic acid fibers, a bioplastic derived from renewable resources. It combines the great thermoregulation and antibacterial proprieties of wool with the lightness and quick dry properties of synthetic fiber.

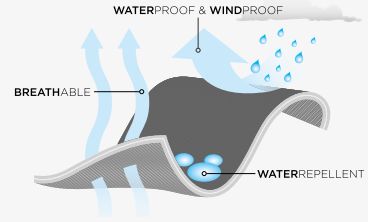

POLARTEC® ALPHA®

Polartec® Alpha® is the first high performance fabric to materialize the concept of active insulation. The low density fibers between air permeable woven layers create a more efficient fabric for regulating warmth and transferring moisture. It speeds up dry times.

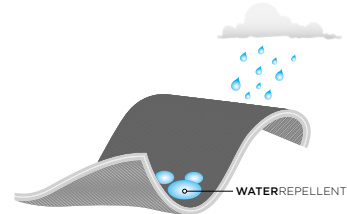

DRYOsphere

DRYOsphere fabrics provide a waterproof/breathable barrier from the elements. A shield against water and wind, DRYOsphere fabric also allows for water vapor to escape from the body, keeping you dry and comfortable in any condition.

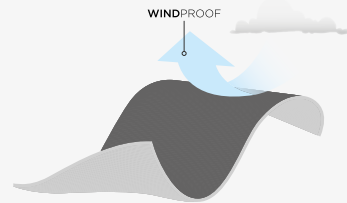

DRYOzone DWR

The first line of defense against precipitation, DRYOzone DWR (durable water repellent) is applied to fabrics to protect against saturation season after season.

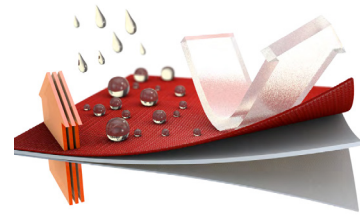

DURObreeze

DURObreeze fabrics act as a barrier against the wind. This windproof technology works by resisting wind penetration, helping prevent heat loss during breezy conditions.

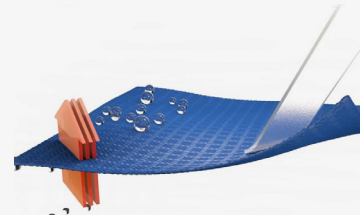

Pertex® Shield

Pertex® Shield delivers lightweight and packable waterproof protection whilst remaining highly breathable.

Pertex® Quantum Air

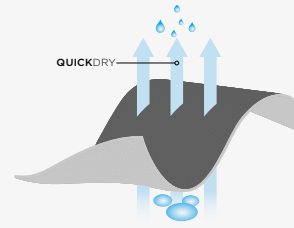

Pertex® Quantum Air is engineered with increased air permeability to provide a balance between wind resistance and breathability.

DRYOxcell

DRYOxcell is a quick-dry technology that wicks moisture away from the skin and disperses it in the fabric over a larger area, protecting against saturation. This accelerates evaporation and keeps you drier, longer.

TORAY™ AIRTASTIC®

The Toray™ Airtastic® fabric is one of the lightest fabrics available (40g/m2). Suitable for lightweight insulated jackets and other clothing, the fabric has a unique air permeability control technology and a soft touch.

drirelease® eco

The unique drirelease® custom blend of synthetic and natural fibers accelerates the water release rate of the fabrics pushing water and perspiration to the outside of the garment into the air, faster than other performance fabrics available on the market, without chemicals. The performance of drirelease is permanent and eco-friendly.

POLARTEC® DELTA™

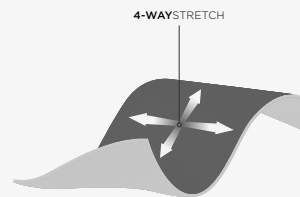

Polartec® Delta™ was created so cooling fabric technologies could better utilize the body's natural cooling process – sweat. Next-to-skin fabrics that target wicking and fast drying will keep moisture moving, but don't work towards actually cooling the body down. Delta™ works more efficiently by elevating touch-points for increased airflow, faster moisture dispersal, and reduced wet-cling.

OTHER TECHNOLOGIES

DUROxpend

A four-way stretch fabric, DUROxpend gives you the freedom of movement and flexibility for adventures that require a greater range of motion.

RE-SOURCE BY SCOTT

At SCOTT, we believe of doing things the right way and for the right reasons. We are committed to improving the impacts of our products and business practices, preserving the environment for future generations and stimulating positive change in our communities.

CO DWR OR PFC-FREE

Perfluorinated and polyfluorinated compounds, also known as PFCs, are a group of fluorinated substances that have long been used as durable water repellence for clothing in the outdoor industry are very bad for the environment because they are very stable, and do not easily break down in nature. Therefore, PFC free/ CO DWR treatments have been developed. They are less durable but more sustainable.

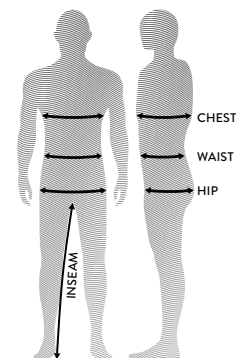

KINETECH™

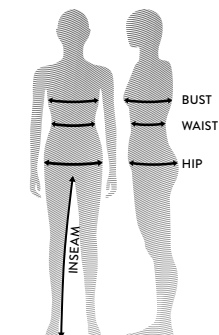

Kinetch™ is all about the creation of fabrics that help the human body as it strives to achieve best performance in sport at highest level. Kinetch™ is a registered trademark of Tessitura Taiana Virgilio S.p.A.

SCOTT TRAIL RC ULTIMATE TR' 5 PACK

289146

Our Trail RC Ultimate TR' 5 Pack is your secret weapon for your trail races. With its ergonomic vest design construction made of superlight fabric, you have everything you need with minimal weight: stretchable front, back and front pockets, two strategically placed flask pockets, adjustable pole fixation and just enough space to carry your essentials while racing in confidence to the top.

COMPOSITION: SHELL FABRIC: 100% Polyester, LINING: 100% Polyester

VOLUME: approx. 5L

APPROX. WEIGHT (G): 100 g (without flasks)

SIZE: XS/S, M, L/XL

FEATURES:

- Superlight materials make this vest incredibly light
- Stretch construction for maximum wearing comfort
- Stretchable front, back and side pockets
- One side pocket with zip closure for valuables
- Two flask pockets with stretch fabric and elastic loop to ensure the flask stays secure in your pocket
- Safety whistle
- Includes two SCOTT ULTRA Flasks 500ml with large 42mm opening (24g per bottle)

SCOTT TRAIL RC TR' 10 PACK

289147

The SCOTT Trail RC TR'10 pack is designed for your ultra trail running adventures and races in the mountains. Made of lightweight fabric, it features strategically placed front pockets to store two soft flasks for water and two additional pockets made of stretch fabric, which provide easy access to bars or gels.

black/yellow

SCOTT SPUR MULTI-LENS CASE SUNGLASSES

266004

SPO SCOTT
PRECISION OPTICS

The SCOTT Spur Multi-Lens Case Sunglasses represent a step further in performance eyewear. The innovative design, with its XL lens creating a perfect shield, is largely focused on protection. The low-profile branches are specifically designed to fit well with helmets, offering added coverage over the temples for optimal comfort. Additionally, the SCOTT Spur features the ELC system, which allows you to switch lenses quickly and easily. The Spur comes with three lenses: a clear one for riding at night or in bad weather, a red chrome Amplifier that enhances contrast in low light and a grey lens that blocks high-intensity rays, thereby reducing eye fatigue on sunny days. These sunglasses also have an adjustable nose piece, and come with a sport multi-lens case and microfiber bag for convenient storage.

FIT: For medium to large faces

- SCOTT laser print

EXTRAS

- Hard case with microfiber bag

SCOTT SHIELD COMPACT SUNGLASSES

289235

The Shield, just smaller. The Shield Compact is optimized to fit smaller faces. The lens is 4mm narrower compared to the Shield, which brings the frame closer to the face and ensures the best fit. Race ready and stylish, all in one piece. Pairing a frameless, cylindrical design with a massive field of vision, the Shield Compact Sunglasses cover the rider's eyes seamlessly and comfortably.

grey light sensitive

The SCOTT Vector Light Sensitive is the perfect blend of performance and lifestyle, made for activities on and off the mountain. The large lens design not only offers a massive field of vision and blocks 100% of UV light, but also protects you from wind and various flying debris. Equipped with our industry-leading Light Sensitive lens technology, these sunnies have you covered in any light or weather conditions. With a construction that avoids pressure points, these shades are as comfy as they get. Grab a pair of the Vector LS and get out there!

RIFF POLARIZED

Modern design, outstanding quality and more eco-responsible.

WHAT YOU NEED TO KNOW

FRAME

The frame is made from ECONYL® regenerated nylon, acquired by recycling nylon waste, such as fishing nets, fabric scraps and carpets.

POLARIZED

Polarized lenses reduce glare and reflections from surfaces like snow, glass and water and significantly improve visual comfort. Polarized lenses also increase contrast and clarity of colors.

LENSES

The lenses are made from bionylon material.

ELECTRONIC DATA INTERCHANGE

WHAT IS EDI - ELECTRONIC DATA INTERCHANGE

Improve your business efficiency and simplify work with SCOTT's electronic data interchange (EDI) SOLUTION. EDI is a solution for computer-to-computer exchange of business documents in a standard electronic format between business partners.

These business documents cover a wide range of options from placing an order, fulfilling the product database with prices, EAN code, product descriptions, or even exchanging electronic invoices, and in some contexts, optionally exchanging stock level information.

TRADITIONAL INFORMATION EXCHANGE

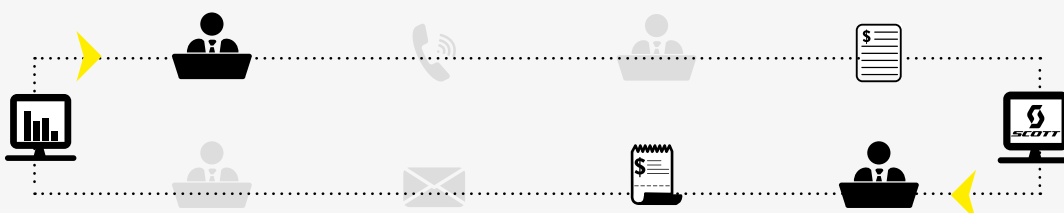

SCOTT EDI SOLUTIONS HELP YOU TO BECOME MORE EFFICIENT

By proceeding with IT connection between our Business Software and your Business Software, both yourself, your collaborators and SCOTT's employees

- ✓ Avoid manual operations
- ✓ Save employees time
- ✓ Avoid human error
- ✓ Simplify business documents and information exchange

WITH EDI AUTOMATIC EXCHANGE

WHO CAN BENEFIT FROM OUR SCOTT EDI SOLUTIONS?

EDI is an electronic format that every business can use, so long as both partners have Business Software compatible with EDI solution.

If you are unsure, contact your IT service provider and ask!

WHAT EDI SOLUTIONS DOES SCOTT OFFER AND HOW COULD I BENEFIT FROM THE SERVICE?

STEP #1

Check with your IT provider if you can handle EDI integration, and what it would cost for you.

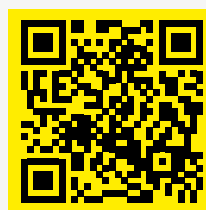

To make the process smoother you can share the technical documentation delivered here:

WWW.SCOTT-SPORTS.COM/EDI

HOW MUCH DOES EDI INTEGRATION COST?

SCOTT offers a range of EDI integration solutions in different data formats. We do not charge anything for the service of integrating with your EDI-ready solution.

The only cost for you would be the cost of enabling EDI capability on your Business software, with your habitual IT service provider.

STEP #2

If your IT Provider confirms your ability to benefit from EDI integration, please contact your usual SCOTT Sales Representative or SCOTT Customer Service, they will deliver all the necessary information for organizing the next steps.

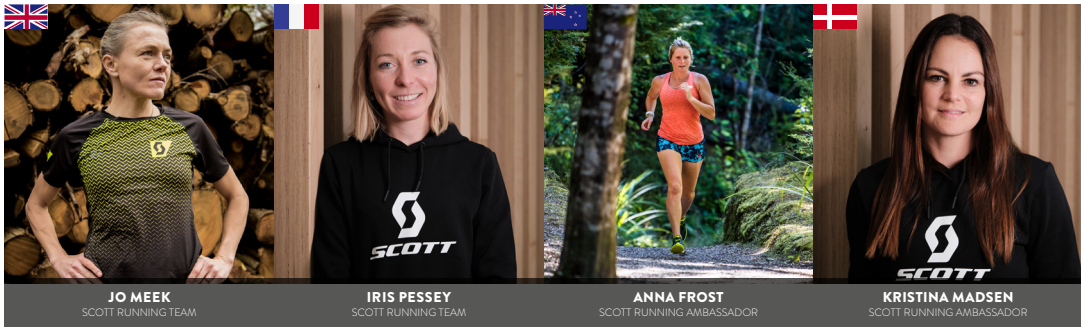

NO SHORTCUTS
